Bison™ Glass Floor Tiles

These glass tiles are a dynamic alternative to ordinary floor coverings and are suitable for high-traffic residential and commercial applications such as kitchens, hallways, foyers, business lobbies, executive suites, and boardrooms. The tiles represent a breakthrough in longevity due to placement of the image on the back-side of the tile. This protects the image from fading due to sunlight exposure and from wearing away due to foot traffic. The tiles can also be used for wall murals, countertop installations, and swimming pools. Individual glass tiles feature a textured finish and are ANSI (American National Standards Institute) and ASTM (American Society for Testing and Materials) compliant.

Interlocking Base Grid

For those looking to install glass floor murals with minimal effort, our plastic interlocking grid system is designed to make the process easy and painless. All you have to do is glue the tiles into the grid and snap the plastic grid pieces together... the spacing is automatic! Installs over most existing floors without special tools, materials, or floor preparation. The grid system can be used in commercial and domestic applications and is especially good for temporary flooring at trade shows and other special events.
